Full Mock 3

Step	What to do						
Before	Testbook → an RRB JE CBT-I full previous paper you have not attempted (2026 shifts first, then Dec 2024). Phone away, water, rough sheets, a clock.						
During	90 minutes, one sitting, no pause. Practise the plan's order (GA → Science → Reasoning → Maths) and the two-round method. Mark every question you skip.						
Rule	No blind guesses. Guess only after eliminating at least one option.						
After	Fill the table below immediately, before you look at any solution.						
Mock 3	Attempted	Correct	Wrong	Left	Net	Time (min)	Target net
Maths							24.67
Reasoning							21.67
General Science							21.00
General Awareness							9.33
Total							76.67
Step	Analysis (60-90 min)						
1	Net = correct – wrong ÷ 3, for each section.						
2	Tag every wrong answer: concept / formula / calculation / misread / careless / guessed . Write the tags in your mistake log.						
3	Solve every skipped question untimed. Solved in under 90 sec? → a selection or speed loss : you knew it. List these separately.						
4	Time per section vs budget (GA 8 · Science 22 · Reasoning 22 · Maths 32 · review 6). Which one overran?						
5	The 3 topics that cost the most marks → tomorrow's weak-topic drill.						
6	Pick 5 questions to redo in 3 days. Send me the table + wrong and skipped questions — I'll diagnose them and send 5 similar ones.						

Science traps — physics and chemistry

These are the statements that sound right but aren't. Most science negatives come from exactly these.

Trap	Truth
Mass changes on the Moon	Weight changes (1/6); mass stays the same
Heavier objects fall faster	Without air resistance all fall with the same acceleration g
Ice is densest at 0 °C	Water is densest at 4 °C ; ice floats because it is less dense
Rear-view mirrors are concave	Convex (wide view); concave for shaving, dentists, headlights
Myopia is corrected with a convex lens	Concave lens; hypermetropia → convex
Blue light deviates least in a prism	Red deviates least; violet most · sky blue because blue scatters most
Fuse goes in the neutral wire	In the live wire; fuse wire has a low melting point
Doubling a wire's length doubles R (when stretched)	Stretching to double length makes R 4 times (area halves too)
Transformers work on DC	AC only

Trap	Truth
Escape velocity depends on the object's mass	It doesn't — only on the planet (11.2 km/s for Earth)
Sound travels fastest in air	Fastest in solids , slowest in gases; not at all in a vacuum
Copper is the best conductor	Silver is; copper is used because it is cheaper
Milk is a solution	Colloid (emulsion)
Dry ice is frozen water	Solid CO₂
Plaster of Paris is $\text{CaSO}_4 \cdot 2\text{H}_2\text{O}$	That's gypsum; PoP is $\text{CaSO}_4 \cdot \frac{1}{2}\text{H}_2\text{O}$
Baking soda is Na_2CO_3	Baking soda = NaHCO_3 ; washing soda = $\text{Na}_2\text{CO}_3 \cdot 10\text{H}_2\text{O}$
German silver contains silver	No — Cu + Zn + Ni
Graphite doesn't conduct (non-metal)	Graphite conducts
Iron is the most abundant metal in the crust	Aluminium ; oxygen is the most abundant element
Isotopes have the same mass number	Same atomic number ; isobars have the same mass number
Rust forms with only oxygen	Needs both oxygen and water
Vinegar contains citric acid	Acetic acid; citric is in lemons
Add water to concentrated acid	Add acid to water , slowly
